

This is the **The Posting-Priority List**, from the PulfrichWebDesign.doc: It gives the current plan for installing new papers on the SIU-C Pulfrich Effect web site.

Papers are alphabetical, by author, and usually follow APA bibliography style except for title word capitalization.

A second list, an exact duplicate sorted by date of publication, is below the alphabetical list.

Rationale of enumeration: Each paper is preceded by a priority number, ranging from 00 to 99, with higher numbers reflecting lower priorities: Higher priority papers will be selected sooner for posting; 0x will be used nonexclusively for Alfred Lit's Priority List; 00 will be reserved exclusively for the initial online Site. Once forwarded to SIU-C for posting, a paper's priority number will be replaced in the list below by a dual hyphen; and, the priority number then will be moved to the end of the reference, in brackets [ ]. Except 00, priority numbers are subject to reuse or reassignment.

Journal names are color coded: Plain color (dark blue) means not relevant to current priority postings; **red** means copyright unresolved but currently relevant; **green** means copyright resolved favorably, so that posting may proceed.

When an **entire reference is dark red**, permission has not been granted. This may be because of refusal, or because a copyright royalty fee has not yet become available; in the latter case, a site-specific abstract or synopsis may be posted instead of the reference itself, either permanently or as a placeholder.

When the journal name is in **light blue**, permission has been granted, but conditions have been imposed which have not yet been fulfilled. In this case, a site-specific abstract or synopsis will be posted, and a reference is provided to the full article or abstract; the full article may be posted in the future.

## Listed Alphabetically:

Prior-ity Code	Author	Title	Instrument	Date	Com-ment
-----	Alpern, M.	Relation of Visual Latency to Intensity.	<i>A. M. A. Archives of Ophthalmology,</i>	1954, 51, 369-	[00] jmw abstract
-----	Alpern, M.	A Note on Visual Latency.	<i>Psychological Review,</i>	1968, 75, 260-	[00] jmw abstract
68-----	Banister H.	Retinal action time.	<i>In Report of a joint discussion on vision, London Physical Society,</i>	1932, 227-235.
